A preposition that indicates location of an object.
To combine; put together two or more quantities.
Any number being added.
Same size, quantity, or amount.
To combine; put together two or more quantities; plus.
A characteristic of an object such as color, shape, size, etc.
A preposition that indicates location of an object.
A preposition that indicates location of an object.
A preposition that indicates location of an object.
A preposition that indicates location of an object.
Larger in size.
A preposition that indicates location of an object.
A collection of things sharing a common attribute.
A shape with no sides and no vertices.
To sort into categories or to arrange into groups by attribute.
To decide if one number is greater than, less than, or equal to another number. Can also be used to tell how shapes are alike or different.

To put together basic elements. (e.g., numbers or geometric shapes)

A solid shape with a circular base, a curved surface, and one vertex.

To name units of a group one by one in order to determine the total number. Counting tells how many things are in a set.

A way to add.
cube A solid shape with six square faces.
curve A line that is rounded.
curved surface A rounded surface.
cylinder
data
day
decompose
A solid shape with two circular bases and a curved surface.
A collection of information.
There are 24 hours in a day.
To separate into basic elements. (e.g., numbers or geometric shapes)

first
expression A mathematical phrase without an equal sign.
The result when one number is subtracted from another.
Not the same; unlike.
Any of the symbols $0,1,2,3,4,5,6,7,8$, or 9 .
One more than seven; one less than nine.
10 ones and 8 ones.
10 ones and 1 one.
Having the same amount. (e.g., 4 equals $3+1$ means that 4 is the same amount as $3+1$.)

A number sentence with an equal sign. The amount on one side of the equal sign has the same value as the amount on the other side.

Smaller quantity or amount.
10 ones and 5 ones.
The ordinal number matching the number five in a position or order of things. Fifth is after third and fourth in a sequence.

5 sets of 10 ones.
The ordinal number matching the number one. First is before all the others in position or order.

greater than

One more than four; one less than six.
Smooth and even. (e.g., plane shapes; two-dimensional shapes)
A surface that is not curved.
One more than three; one less than five.
10 ones and 4 ones.
The ordinal number matching the number four in a position or order of things. Fourth is after second and third in a sequence.

A chart that shows mathematical information.
Greater than is used to compare two numbers when the first number is larger than the second number. (Symbols are not used in Kindergarten.)
heavier
Having a weight that is greater than that of another object.

match

A measure of how tall something is.
A plane shape with six straight sides and six vertices.
10 sets of 10 ones.
A prepositional phrase that indicates location of an object.
More.
A measure of how long something is.
Having a value that is not as great as another value.
Less than is used to compare two numbers when the first number is smaller than the second number. (Symbols are not used in Kindergarten.)

Having a weight that is less than that of another object.
A word used when comparing the length of two objects.
A strategy that uses combinations of numbers that add up to ten.

One-to-one correspondence.

A symbol that shows subtraction; take away a quantity. Greater quantity or amount.

A prepositional phrase that indicates location of an object.
One more than eight; one less than ten.
10 ones and 9 ones.
A number indicates how many or how much.
A set of two numbers. (e.g., 1 and 4 are number pairs because together they make another number.)

A symbol used to represent a number. (e.g., 6 and VI are numerals that represent the same number.)

A material thing that can be seen and touched.
One more than zero; one less than two.
A single unit or object.
A symbol that shows addition; combine; put together two or more quantities.

How much there is or how many there are of something.
A plane shape with 4 sides and 4 square vertices.
To move something by turning it over and over.
An arrangement of numbers or objects from left to right.
Alike in size, quantity, or amount.
Objects with heights that match.
Objects with lengths that match.
Alike in quantity or amount. (e.g., Both sets have the same number.)

Objects with weights that match.

sides of equal The length of a side tells how long it is from one end to the
The ordinal number matching the number two in a position or order of things. Second is after the first in a sequence.

One more than six; one less than eight.
10 ones and 7 ones.
The form or outline of an object. (e.g., two-dimensional and three-dimensional shapes)

A word used when comparing the height or length of two objects.

One of the line segments that makes a flat, two-dimensional shape. other end. If the sides are of equal length, it means that they have the same length. (e.g., A square has 4 sides of equal length.)

One more than five; one less than seven.
10 ones and 6 ones.
How small or big something is.
To move something without turning it or lifting it from a surface.

Having a size that is less than that of another object.
A shape that is not flat; an object that has three dimensions. (i.e., height, length, and width)

To group or organize according to shared attributes.
A solid shape with a curved surface.
A plane shape with 4 sides that are the same length and 4 square vertices.

To put one object on top of another.
Take away; remove; compare.
sum
take away To subtract.
taller A word used when comparing the height of two objects.
ten One more than nine; one less than eleven.
tens $\quad$ Sets of ten ones. (i.e., $10,20,30,40,50,60,70,80$, or 90 )
third The ordinal number matching the number three in a position or order of things. Third is after first and second in a sequence.
thirteen
three One more than two; one less than four.
three-dimensional A solid shape that has length, width, and height. shape
triangle A plane shape with 3 straight sides and 3 vertices.
twelve
twenty Two sets of 10 ones.
two One more than one; one less than three.
two-dimensional A plane, flat shape that has length and width.
shape
vertex
week
zero
weight A measure of how heavy something is.
A corner of a shape. (plural - vertices; "corners")
There are seven days in a week: Sunday, Monday, Tuesday, Wednesday, Thursday, Friday, and Saturday.

No objects; a cardinal number indicating the absence of all units.
